

Wilderness Machine: Bird Shaker, Eavesdropper

the machinery tangles up its results in
uncontrolled data fields
wild wind bursts

massive cloud turbinators
click and turn
many birds into confetti
get an urban wildlife skin
now it's your new interface

this program makes you cry

time's spreading out

miles of delicate circuitry's spreading out across the land

the Machine inserts a river here

your interface feels used

at this late flood stage hinged and impulsive too

this program makes you standoffish

impaired nests cast out their innards
small blood-chipped cheeping

all the microphones have been switched on:
go ahead say something

Wilderness Machine: Dumbbell Elkhorn Experiment, Lake Names Beginning with *D* through *F*

fiver echo elm
dry falls
flat—

dogfish falls
flat—

first echo
first flying cloud

forest forget-me-not
forest figure eight

dirty house
disappointment
dirty nose
dishpan dinner

first emerald eve

double dragon dog dollar:
eleven eleven eleven eleven
egg egg elk elk fig farm fee

dirty house
disappointment
dirty nose
dishpan dinner

found:
-fishmouth feather
-flat floodwood
-elephant dove

first echo:

fly
double elbow duck fanny

fly far
elkdoefawn eagle

note: Every word in this poem is a Minnesota lake name, as listed in the Directory of Lakes from *Atlas of the State of Minnesota*, compiled and published by the Thomas A. Nelson Co., 1962.

Wilderness Machine: Budget Oversight Committee/Wild Boars Club

It has come to our attention
that you are wishing to seek
membership.

It has come to our attention
that

In Florida wild hogs may be hunted year round with no license on private property only. We have several properties in the S.W. Florida area that we consider "Honey Holes" for hog hunting because in these ranches there is always plenty of hogs coming to our automatic corn feeders. You can expect to see 10 to 20 or more wild hogs in these areas every morning at sun-up and afternoon before sundown. Our hunts are guaranteed-kill in one day or you can hunt again another time for free till you kill your hog.

Yes. Well, two kills without feed corn are required
and photos of such kills certified
by a licensed agent for initial consideration.

Face-to-face interviews after that
wherein each candidate should expect
intense grilling.

Whereupon a probationary period
begins. And the proto-member
can feel things out.

Is this a good fit? etc.

All of our hunts are guided and completely private that means you and your party have exclusive access to the ranch. There will be no one else hunting on the property the day you reserved. We have morning or afternoon hunts available most of the year with game processing and taxidermy also available.

Several machines are in use at all times.
Do not be alarmed at the grinding sound.
This is simply due to residue.
Also, some machines are only calculating
so that the Machine can stop
looking over its shoulder all the time!

The Budgetary Oversight Committee (BOC) is charged to:

- Coordinate the integration of the fisheries and wildlife oversight committee reports into an annual report to the legislature; recommend changes on a broad level in policies, activities, and revenue enhancements or reductions; and provide a forum to address issues that transcend the fisheries and wildlife oversight committees;
- By August 15 of each even-numbered year, develop recommendations for a biennial budget plan and report for expenditures on game and fish activities.

It is the decision of this committee
that the Machine's bona-fides
outweigh any budget concerns
at this time.
Please proceed.

We welcome all first time hunters. Young or old there is no age limit. If you can shoot a gun or a bow with accuracy at a moderate distance you will kill a good sized hog on this hunt we guarantee it. If you have no gun that's no problem we have good guns and ammo for you to use at no extra cost. If you have special needs we can accommodate you. We will do whatever it takes for you to come out and experience a great day of hunting.
